

Delivery Driving

January 1, 2006 – July 31, 2021

I deliver in west St. Louis County, the Domino's stores in Des Peres and Chesterfield, MO. It is a great place to work. While I was in Des Peres it was normal to not be tipped less than five times a month. Chesterfield, once or twice a day.

Summary

- Tips and wages rise with the check average. Wages are also driven by changes in the minimum wage.
- Total wages are driven by tips and gas reimbursement. In 2011 the company switched from 'per address' (\$1.10 per address) to cents per mile (\$0.32 per mile) reimbursement. For me, in an area with large houses, this doubled my reimbursement.
- "Bonus" tips for delivering during COVID lasted about two months. PPP reimbursed "hazard pay" lasted slightly less.
- Who lives in the White House has zero effect on gasoline prices. The proof is on the graph.

Notes

- Certain events are marked on the monthly data. The St. Louis Blues playoff/Stanley Cup run was great for the pizza business.
- The start of COVID is marked by a red line on the graphs. By red dates on the monthly data.
- Presidential terms are color coded on the bottom of the Gasoline Price graph. GW Bush, Obama, trump, Biden.

Delivery Data
January 2006 - July 2021
