

Coyote & Crow

Coyote and Crow is a tabletop role playing game set in an alternate future of the Americas where colonization never occurred. Instead, advanced civilizations arose over hundreds of years after a massive climate disaster changed the history of the planet. You'll play as adventurers starting out in the city of Cahokia, a bustling, diverse metropolis along the Mississippi River. It's a world of science and spirituality where the future of technology and legends of the past will collide.

I love the story of the Cahokians. Around 600 CE, when Mohammed walked the earth and the stories of Jesus were starting to be written, The Cahkians were building a huge city on the Mississippi near what is now St. Louis. By the time the Crusades started, Cahokia was larger than London. But, by the mid 1300's, Cahokia was abandoned leaving its mounds and Woodhenge.
